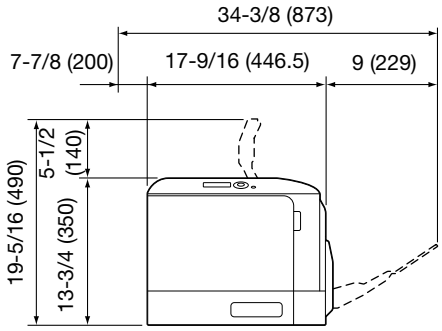
2.2 Installation location and environment

2.2.1 Installation location

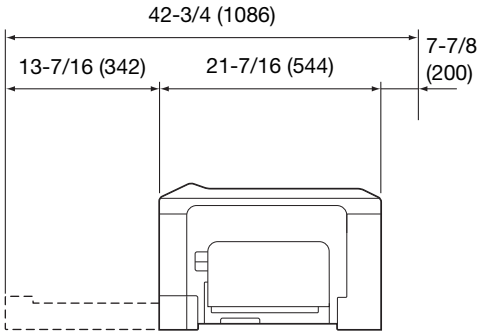
To simplify tasks such as operations, consumable replacement, or inspection, create an installation environment as shown below.

Unit: Inch (mm)

Front view

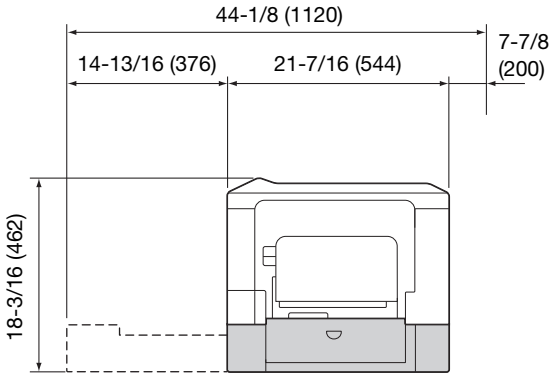


Right view



Right view (with optional devices installed)

The hatched parts indicate optional devices in this figure.



2.2.2 Installation environment

Install this machine in a location that can support its weight, including consumables and paper.

Configuration	Weight
Main unit (including consumables)	Approx. 62-3/8 lb (28.3 kg)
Main unit (including packages)	Approx. 72-3/4 lb (33 kg)

Install this machine in the place shown below.

- Stable and horizontal (inclination around this machine: 1 degree or less) location with a hard, even surface
- To check whether the installation location is level, use a normal round pencil. If the pencil rolls, the location is not horizontal. Ensure this machine is horizontal, and make sure that there are no objects such as cables caught under this machine.
- Location close to a dedicated power outlet that is grounded
- Location close to your computer
- Sufficiently spacious location that ensures ease of use and appropriate air ventilation
- Location in which ambient temperature is 50°F to 86°F (10°C to 30°C) and humidity is 15% to 85%

Do not install this machine in the locations described below.

- Location exposed to direct sunlight
- Location in which excessive differences in temperature and humidity are detected due to close proximity to a heater or cooling equipment
- Location exposed to direct flame or combustible materials
- Location close to equipment such as a copy machine or air-conditioner that generates noise, or equipment such as a refrigerator that generates a strong magnetic or electromagnetic force
- Location close to water, water pipes, or fluid (drink) containers, corrosive chemicals, or corrosive gases such as ammonia
- Location in which fine metallic pieces such as clips or staples are scattered
- Location subject to thumping vibrations

Tips

- Do not connect to the same power outlet as that used for a high-current equipment.
- If this machine is installed in or moved to an environment subject to excessive changes in temperature, condensation will form in this machine, which may reduce printing quality. If condensation is detected, leave this machine for approximately 1 hour before using it to adjust to the environment.
- When using a humidifier or vaporizer in the room where this machine is installed, use purified or distilled water. If impurities in water are emitted into the air, they will collect in this machine and reduce printing quality.

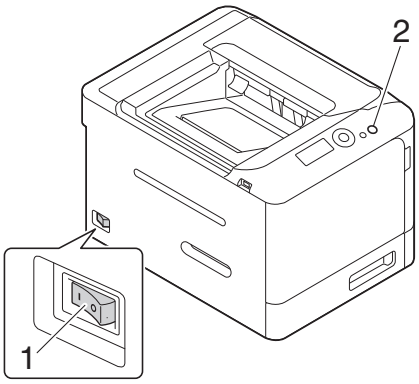
4 Turning the Power ON or OFF

4 Turning the Power ON or OFF

4.1 About power supply

This machine has two power switches: **Power Switch** outside the machine and **Power** key on the **Control Panel**.



No.	Name	Description
1	**Power Switch**	Press this switch when turning the main power of this machine on or off, or when restarting this machine.
2	**Power** key	Press this key to switch this machine to Power Save mode. This function reduces power consumption and has more significant power saving effect. For details, refer to page 4-4.

NOTICE

*While printing, do not turn the **Power Switch** off or press the **Power** key. Otherwise, it may lead to a paper jam.*

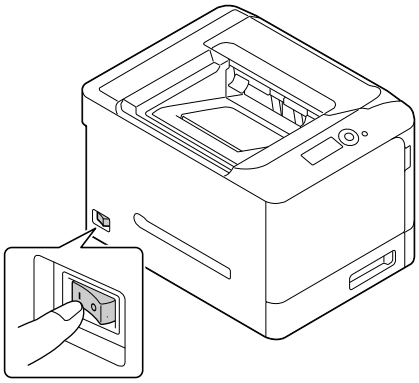
*If the **Power Switch** is turned off or the **Power** key is pressed while this machine is running, the system deletes the currently loaded data or communicating data as well as queued jobs.*

4.2 Turning the Power Switch ON or OFF

1 Connect the **Power Cord** to this machine.

2 Connect the **Power Cord** to the power outlet.

3 When turning the main power on, press | of the **Power Switch**.



This displays the screen showing that the machine is running the start-up process.

When **Message Window** appears in the [READY], it indicates that this machine is ready to run.

4 When turning the main power off, press ◯ of the **Power Switch**.

NOTICE

*When restarting this machine, turn the **Power Switch** off and on again after 10 or more seconds have elapsed. Not doing so may result in an operation failure.*

4.3 Using the Power key

Press the **Power** key to switch this machine to Power Save mode.

When the **Power** key is pressed, the status of this machine changes as shown below. Depending on how long the **Power** key is pressed, the state of the power saving mode to be activated will differ.

Power key	Status of this machine	Status of LED	Print	Description
Short press	Sleep	Flash: Blue	Enable	Turns off the backlight of the **Message Window** to reduce power consumption. The indicator at the top of the **Message Window** lights up blue. If a print job is received, it is printed while Sleep mode is held in the active state. Operating the **Control Panel** returns to Normal mode.
	Deep Sleep	Flash: Blue	Enable	Reduces power consumption further than when in Sleep mode. The display of the **Message Window** is turned off completely. If a print job is received, this machine shifts to Sleep mode to execute the print job, then returns to Deep Sleep mode. The time required to return to Normal mode is longer than that required to return from Sleep mode. To return the machine from Deep Sleep mode to Normal mode, press the **Power** key again.
Hold down	ErP Auto Power OFF	Flash: Orange	Disable	This function provides a more significant power saving effect than Deep Sleep mode, which is close to the state where the main power is turned off. To enable the machine to return to Normal mode from the ErP Auto Power OFF status, press the **Power** key again.

Tips

- The area, excluding 3/16 inches (4.2 mm) from the paper edge, is used as the printable area on all paper sizes. When configuring a user setting of the page size using the application, specify the paper size within the printable area so that the optimal result is obtained.
- On an envelope, it is only possible to print on the front (address) side. Also, the result of printing on the seal overlapping part on the front side cannot be assured. The area that cannot be assured varies depending on envelope types.
- The page margin setting is determined depending on your application. If the default paper size or margin is selected, there may be some part of the paper that is not able to be printed on. To obtain the optimal result, configure the custom size setting so that an image is included in the printable area of this machine.
- Specify the custom size in the range of the numeric values shown in the table above using the printer driver.
- When custom-size paper over width 8-1/4 inches (210 mm) and length 11 inches (279 mm) is used in **Tray 1**, its trailing edge is loaded in the bent state due to the tray structure (Maximum length 11-11/16 inches (297 mm)). To load such custom-size paper, use the **Manual Feed Tray** or load up to 100 sheets in **Tray 1**.
- In Mac OS X environment, the maximum size of the **Manual Feed Tray** that can be used for 2-sided printing is "width 8-1/2 inches (216 mm) × length 14 inches (355 mm)".

5.1.3 Precautions for correct operations

Unavailable paper

Do not load the following types of paper into the tray. Not observing these precautions may lead to reduced print quality, a paper jam, or machine damage.

- Paper that has been printed on using a heat-transfer printer or an inkjet printer
- Folded, curled, wrinkled, or torn paper
- Paper that has been left unwrapped for a long period of time
- Paper that is damp, perforated, or that has been hole punched
- Extremely smooth or extremely rough paper, or paper with an uneven surface
- Treated paper such as carbon-backed paper, thermal paper, pressure-sensitive paper, or iron-on transfer paper
- Paper that has been decorated with foil or embossing
- Paper of a non-standard shape (paper that is not rectangular)
- Paper that is bound with glue, staples or paper clips
- Paper with labels attached

- Paper with ribbons, hooks, buttons, etc., attached
- Paper with different paper quality (roughness) on the front and back sides
- Paper that is too thin or too thick
- Paper containing static electricity
- Acidic paper
- Other types of unavailable paper

Storing paper

To store paper, be sure to note the following points.

- Store paper on an even, horizontal surface, and do not take the paper out of its packaging until it is loaded into a tray. If paper is left for a long period of time outside its package, it may cause a paper jam.
- When not using paper that has been taken out of its package once, return it to the original package and store it in a horizontal, cool, dark place.
- Do not store paper in locations or in environments that are:

- Too humid
- Exposed to direct sunlight
- Subject to high temperatures (95°F (35°C) or more)
- Too dusty

- Do not set paper against the other or store it vertically.

Tips

When purchasing a large quantity of paper or special paper, carry out a trial print to check the printing quality in advance.

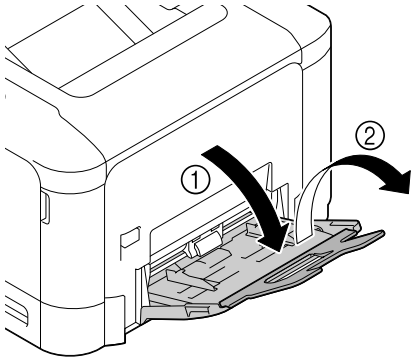
5.2 Loading paper into the Manual Feed Tray

How to load paper into the Manual Feed Tray

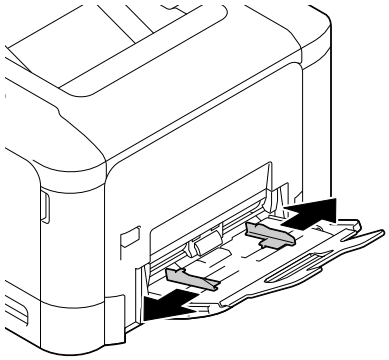
When selecting a paper size other than for paper trays, use the **Manual Feed Tray**.

To use the **Manual Feed Tray**, load paper and specify the paper type.

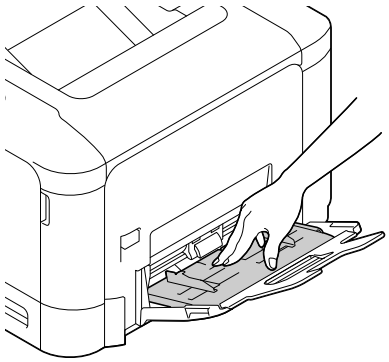
1 Open the **Manual Feed Tray**.



2 Spread out the paper guide.



3 Push up the center of the flip-top plate until the lock latches (white) at the right and left are locked.



4 With the side to be printed on facing down, insert the paper as far as possible into the feed slot.

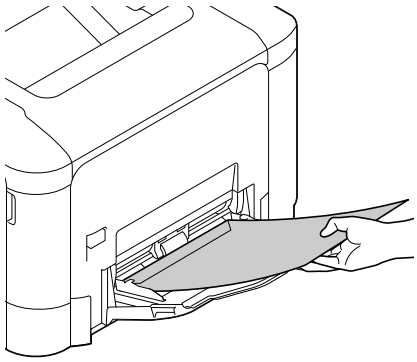
Loading envelopes

Up to 10 envelopes can be loaded into the tray at a time.

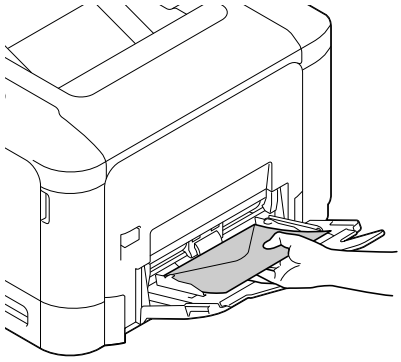
NOTICE

Before loading, remove air from the envelope(s), and securely press along the flap fold line. Otherwise, it will result in wrinkles or a paper jam.

1 Position so the flap part is facing up, and load an envelope as shown in the figure.



➔ If a cap is in the long side of an envelope (western-style envelope #2, western-style envelope #6, or envelope DL), load the cap into the machine side.



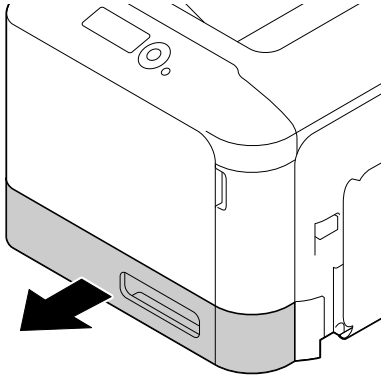
2 Align the paper guide to the paper size.

3 Change the paper type and paper size on the **Control Panel**.

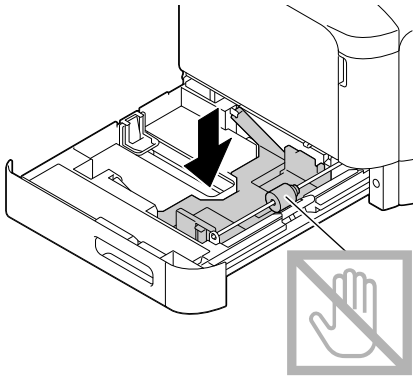
➔ To configure settings: **Menu/Select** - [PAPER MENU] - [PAPER SOURCE] - [MANUAL]

5.3 Loading paper into Tray 1

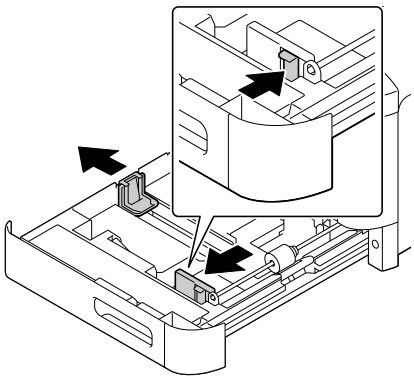
1 Pull out **Tray 1**.



2 Press the flip-top plate down until it is locked.



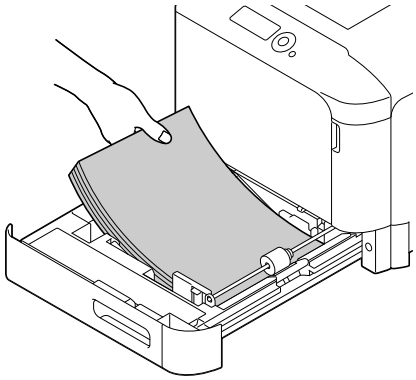
3 Spread out the paper guide.



4 Load paper into the tray with the print side facing up.

➔ For details on the available paper sizes, refer to page 5-2.

➔ Load a postcard or reply postal card, turning the short side to the right-hand side of the tray.



NOTICE

8.3 Standard operating life of consumables and periodic replacement parts

Item	Standard average operating life
Print Unit	Approx. 30,000 pages (The continuous printing)
Toner Cartridge	**Toner Cartridge** supplied with the product: Approx. 5,000 pages (3 pages/job) **Toner Cartridge** for replacement: Approx. 5,000 pages (3 pages/job)
Waste Toner Bottle	Approx. 6,500 pages (full color)
Secondary Transfer Unit	Approx. 100,000 pages (3 pages/job)
Fuser Unit	Approx. 100,000 pages (3 pages/job)
Transfer Unit	Approx. 100,000 pages (3 pages/job)
Media Feed Roller	Approx. 300,000 pages

Tips

- The above indicates a numeric value for 1-sided printing with A4- or letter-size paper. The actual operating life varies (decreases) depending on printing conditions (printing ratio, paper size, etc.), printing method such as the continuous printing (a print job of four pages on average is optimal for consumables) or the intermittent printing (when a print job of one page is executed multiple times), and the paper type such as thick paper printing. It is also affected by the ambient temperature and humidity.
- In a color printer, all toners are consumed in minute amounts regardless of black and white printing or color printing at the time of initialization by machine power-on or -off or automatic adjustment to maintain printing quality. Even when printing in black and white, color toners are consumed, and their cartridges must be replaced.

For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

“Contribution” shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as “Not a Contribution.”

“Contributor” shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License.

Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License.

Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution.

You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

a. You must give any other recipients of the Work or Derivative Works a copy of this License; and

b. You must cause any modified files to carry prominent notices stating that You changed the files; and

c. You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

d. If the Work includes a “NOTICE” text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License. You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions.

Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks.

This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty.

Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an “AS IS” BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability.

In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability.

While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

APPENDIX: How to apply the Apache License to your work

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don’t include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.
